

Compusearch

PRISM

The Federal Acquisition Solution

Serving more than 33,000 users at more than 75 federal civilian, defense, intelligence, and other public sector organizations worldwide.

There is a reason PRISM is number one.

Federal acquisition is not a simple clerical process; it is an important, complex business that directly affects every aspect of an agency's mission.

More and more frequently, acquisition professionals are called upon to assume the role of business advisors as they carefully guide each action to ensure best value and compliance with federal mandates.

Today's acquisition offices face the challenges of bigger workloads, smaller staffs, fewer dollars, and shorter turnaround times.

Success demands a fully integrated acquisition solution that can guide infrequent users and involve important stakeholders such as program offices, financial and legal departments, and contractors at the right time and in a meaningful way.

PRISM manages the complex business of government.

Compusearch

PRISM is the Federal

PRISM is the only solution that was specifically designed to meet the demanding requirements of federal acquisition. It is not a business modeling program or a commercial purchasing system trying to adapt to the federal space; it is a true federal acquisition management solution.

PRISM Works for More Than 75 Federal Clients

More than ever, federal agencies need a solution that increases productivity and stays ahead of changing regulations. Agencies need a solution that is quick on its feet; one that thinks and works like they do. PRISM is that solution.

PRISM users benefit from the contributions, experiences, and best practices of the entire PRISM community. ***Today that community is over 33,000 members strong in more than 75 organizations worldwide.***

Streamline the Acquisition Process

From requisitioning to closeout, PRISM guides procurement professionals through the acquisition process, minimizing data entry and maximizing efficiency through electronic routing, workflow, and workload management. In addition, PRISM provides solutions that guide infrequent users and increase accessibility to contract catalogs.

Take Control

With built-in system switches, configurable business process rules, and more, PRISM offers complete control throughout the acquisition life cycle.

Manage More Effectively

Detailed reporting, workload management, milestone tracking, and performance metrics make PRISM a powerful management tool.

Acquisition Solution

Achieve Mission Objectives

PRISM is a marketplace leader that helps federal acquisition organizations achieve:

- Strategic Sourcing
- Spend Management
- Real-Time Visibility
- Improved On-Contract Buying
- Increased Procurement Capacity
- Improved Productivity

PRISM Helps Agencies “Get to Green”

PRISM fully supports commitment and encumbrance accounting and real-time obligation management through proven financial interfaces.

Currently, PRISM is interfaced to more than 30 federal systems, including FSIO certified financial systems, IAE initiatives, asset systems, and other business management systems.

Now fully integrated with
FedConnect

FedConnect bridges the gap in the electronic acquisition process by helping agencies to efficiently capture and manage transactions and interactions with vendors in a structured and secure environment.

FedConnect is a web-based portal that works with PRISM to provide an effective mechanism for incorporating vendors into the automated acquisition process.

This direct pipe between PRISM and your vendors eliminates the need to re-key data from vendor responses or to manually maintain records of vendor interactions. The results – fewer overall steps in the acquisition cycle and more complete and accurate acquisition records.

Compusearch's newest
addition to the PRISM Suite.

Compusearch

The Surest Path to Acquisition System Success

***We know what you are trying to achieve.
We understand your federal processes.
We have the right solution.***

For 25 years, Compusearch has worked with federal acquisition professionals to develop the most comprehensive suite of acquisition management tools and services available in the federal market space.

From the very beginning, Compusearch has pioneered and set industry standards. Compusearch was the first to develop a fully searchable, electronic FAR, the first to offer comprehensive contract management based on federal standards, the first to integrate with FPDS-NG, and the first to provide real-time access to CCR as part of a COTS solution. Compusearch continues to be the innovator in providing flexible systems to meet the changing needs of federal acquisitions.

Compusearch's success can be most directly attributed to the close working relationship we have maintained with the federal community. ***Quite simply, we listen.*** In fact, much of our product design and service offerings come about as a direct result of input from the PRISM Federal User Group, an agency-chaired and -directed organization.

Today, Compusearch solutions and services are used by more than 75 federal organizations across the civilian, defense, intelligence and public sectors.
